### **PREFACE**

Agriculture, the primary sector, is playing a vital role in providing one of the basic necessities of human kind. The Agricultural Sector is the base for estimation of State Domestic Product under Secondary and Tertiary Sectors. So the data analysis and inference of reliable Agriculture Statistics and its accuracy is very important.

This report has been designed to serve the policy makers, dealing with preparation of production plans for food and other agriculture uses. This report provides data on Agriculture, Rainfall including seasonal conditions, prices of agricultural commodities and wages of agricultural labour. This report, fifty Sixth in its series, has been classified into 3 divisions, where Part-I briefly gives an account of population, rainfall and seasonal conditions, classification of area, area of crops irrigated and the area under all crops as well as production and yield particulars. Part-II contains summary tables of the Union Territory as a whole for the last five years enabling comparison over a period of time. Part-III of this publication presents region - wise statistics for the year under reference.

I wish to record my special appreciation to Thiru R. Parthasarathy, and Thiru. S.Rathinavelu, Deputy Directors and the dedicated officials working in Agricultural Statistics Section for their kind support in bringing this publication in time. Suggestions for the improvement of this publication are highly solicited.

## **STATISTICAL SCENARIO IN THE U.T.**

With the increasing involvement of the state in welfare activities, there is a growing need for statistics in all productive activities and their presentation in a meaningful framework to facilitate decision making. This led to the creation of Directorates of Economics and Statistics (DES) in all States and Union Territories. For the purpose of co-ordination of Statistical activities of the Union Territory of Puducherry,

and for the promotion of Statistical standards, the Directorate of Economics and Statistics was set up in August 1957 in the U.T of Puducherry.

The main thrust of the Directorate in the initial years was to serve as a focal point of information on various subject matter fields of statistics. DES has been declared as Nodal Agency for all the statistical activities of the Union Territory of Puducherry during 1982. Since then DES is acting as the Nodal Agency and Statistical Authority for developing and managing the statistical system in the Union Territory.

The Directorate has witnessed continuous growth over the years and the responsibilities of the Directorate both in terms of scope and nature of work has increased considerably. The Statistical Science has assumed paramount importance for socio-economic planning and policy formulation in recent years. DES plays a key role in building up of a sound data base covering various sectors of the U.T economy and provides valuable inputs for planning and policy formulation.

The Directorate of Economics and Statistics, Government of Puducherry is declared as the State Agricultural Statistics Authority and the scheme viz “ Collection of Agricultural Statistics” is being implemented in Puducherry Region since 1961-62 and in phases this scheme was extended to the other three regions of the Union Territory of Puducherry. The Field Supervisors of this Directorate, are responsible for the collection of field level statistics in the three seasons of an agricultural year. These primary workers visit each and every plot and collect “Land Utilization Statistics” with the help of village maps supplied by the Revenue Department, Puducherry. The supervisory staff of the Directorate provide able guidance to the primary enumerators in carrying out their work successfully and scientifically.

## WAGES PAID TO AGRICULTURAL LABOURERS

Statistics relating to daily wages paid to agricultural and skilled labourers are collected every month from four selected centres at Puducherry region, two selected centres at Karaikal region and one selected centre at Yanam region of the Union Territory of Puducherry. The agricultural labourers are mainly classified into two groups.

viz., i) Field Labourers and ii) Skilled labourers.

Field labourers comprise of Ploughmen, Sowers, Transplanters, Weeders, Reapers and Harvesters. Skilled labourers are Carpenters and Blacksmiths. Data regarding average daily wages paid to agricultural labourers during 2017-18 in Puducherry, Karaikal and Yanam regions are detailed in the tables VII-A, VII- B and VII-C (at page No.45-46,47). The summary table consists of the average daily wages in respect of Union Territory of Puducherry. The index numbers of agricultural wages are also given in a separate table taking the agricultural year 2007-08 as base year.

The average daily wages paid to each category of labourers had been computed with simple arithmetic mean of the wage rates that prevailed in the seven selected centers on the last working day of every month during the year 2017-18. The base year average of daily wages has been worked out with the simple average of all months of the year 2007-08.

The monthly wage relative computed by expressing the average daily wages paid to each category of Labour during a month of the current year as percentage of the corresponding base year average wage rates.

The average daily wages paid (in Rupees) to the agricultural and skilled Labourers are detailed below:

### **FIELD LABOUR**

## REVIEW ON AGRICULTURAL INDICES

Agricultural Indices are computed with the base year of triennium ending 2007-08 =100. Index numbers for area under all Crops, Net area sown, Yield, Agriculture production, Cropping intensity, productivity per hectare and Cropping pattern are constructed.

The index of area under all crops shows a downward trend every year due to unstable cropping pattern followed by ryots and availability of water. In 2017-18 the index is 69.74.

The index of net area sown also varied from 96.27 in 2007-08 to 71.35 in 2017-18, showing a mixed trend.

The index of yield per hectare crossed the 100 mark for the past Eight years, which is a good sign of improvement. The current year 2017-18 the index number is 120.92.

The index of agricultural production decreased by 84.78 points from the previous year and stood at 79.70 in 2017-18.

The index of cropping intensity shows as trend at 97.74 in the year 2017-18.

Accordingly, the list of operational holder furnishing

the particulars of survey numbers operated with particulars of tendency were compiled by the Karnams of Revenue Department and the re-tabulation of data was done by the Field Supervisors of the Directorate of Economics and Statistics with the help of the list of holders furnished by the Karnams and Khasra Registers prepared by the Field Supervisors.

The Ninth Agriculture Census 2010-11 was conducted in the Union Territory on complete enumeration basis in collaboration with the Revenue Department through re-tabulation of data available in the villages land records of the Revenue Department and Khasra register maintained by the Directorate of Economics and Statistics at the village level. The Secretary (Economics and Statistics) and the Director of Economics and Statistics were nominated as Agriculture Census Commissioner and Technical Officer respectively for planning, monitoring and organization of the Census operation in this Union Territory.

The Agriculture Census 2010-11 comprised of two phases viz 1) Agriculture Census 2010-11 and 2) Input Survey 2011-12. Under the Agriculture Census, data were collected for the following 6 characteristics according to 10 size classes of operational holdings:-

- 1) Number and area of operational holdings
- 2) Tenancy/Terms of leasing
- 3) Land Utilisation
- 4) Irrigation status and source-wise area irrigated
- 5) Cropping pattern, and
