## **F O R E W O R D**

The Budget-in-Brief 2015-16, published by the Directorate of Economics and Statistics, Puducherry is the 52<sup>nd</sup> issue in this series. The publication features the fiscal activities of the Union Territory of Puducherry for the years 2013-14 (Actuals), 2014-15 (Revised Estimate) and 2015-16 (Budget Estimate) in terms of fiscal aggregates such as Revenue and Expenditure, Public Debt etc. It also shows the trends in Tax and Non-Tax Revenue and Development and Non-Development Expenditure, Public Debt and interest payment etc. in respect of the U.T of Puducherry for the years from 2013-14 to 2015-16.

Fiscal policy involves the use of Government spending, taxation and borrowing to influence both the pattern of economic activity and also the level and growth of aggregate demand, output and employment. Fiscal policy is used on demand side by increasing Government spending or reducing taxation so as to increase aggregate demand and boost employment and output. Fiscal policy is also used to influence the supply side performance of the economy as changes in fiscal policy can affect competitive conditions of individual market and industries and thereby alter the production. The statistical tables supported by suitable analytical notes, charts and graphs of the fiscal aggregates such as components of revenue receipts and revenue expenditures, capital receipt and capital expenditures, public debt, loans and advances disbursed etc. make the publication more interesting.

I am happy to record my appreciation to the Officers and officials of the Directorate of Economics and Statistics, Puducherry for their effort in the preparation of this Publication. I hope this publication will be useful to the fiscal experts, Research Scholars and data users in field of Public Finance.

## **P R E F A C E**

The Directorate of Economics and Statistics brings out the publication “Budget-in-Brief” as a follow-up of the State Budget in the Assembly each year. The present publication is the 52<sup>nd</sup> issue in the series. With in India, the State concern has been regularly generating large volume of Social Economic data since Independence. In the context of the liberalized Economy, timely reliable and adequate volume of data assures significance.

The present statistical system depends mainly on the data available from the Budget document and Annual Accounts of the Government for Government sectors. The existing mechanism of data collection and analysis does not keep pace with needs of the Economic Policy decision. The fiscal activities of the Union Territory of Puducherry for the years 2013-14 (Actuals), 2014-15 (Revised Estimate) and 2015-16 (Budget Estimate) are brought out to highlight the comparative growth in Revenue Receipts and Expenditures. Detailed Statistical Tables are presented to make the data more comprehensive and also to give scientific presentation.

I congratulate Thiru R. Parthasarathy, Deputy Director and his team of officials in bringing out the publication. There is no doubt that this publication will be of great useful to the Planners and Predictors on Administrative sources for better planning.

Suggestions for improvement of this publication are welcome.

## INTRODUCTION

Rapid and balanced economic growth with equality and social justice has been the general objective of all Government policies and plans. Budget plays a very important role as a framework on which Government applies the policies related to revenue and expenditure. It helps the economy to work in an efficient way and to identify the weakness. Economic inequality is an inherent part of every economic system. *Government* aims to reduce such inequalities of income and wealth, through its budgetary policy. A budget document in a well informed system reveals the objective of budgeting such as accountability and transparency and thereby enhances conviction. Further it serves as a feed for the Researchers, Economists and other critics. A budget brief is such a handy tool that serves this purpose.

**Measures of Resource Gap: Concept and definitions.**

There is no single criterion to measure the resource gap in the Government finances. The choice of a particular measure is, therefore, purpose specific. In the context of Indian Public finance, the traditional approach while measuring the resource gap takes into consideration revenue account gap, capital account gap and overall gap. Of late, there has been a frequent mention of the concept of Gross Fiscal Deficit (GFD) by Researchers while analyzing the Finance of the State Government; one variant of GFD viz., primary deficit, which is analytically useful to examine the current operations of the Government finances, has been introduced in Indian public finance. The different measures of deficit (resource gap) are set out below.

- (a) Revenue Deficit (RD) denotes the difference between revenue receipts and revenue Expenditure.

$$\text{Revenue Accounts Gap} = \text{Revenue Deficit (RD)} = \text{Revenue Receipts (RR)} - \text{Revenue Expenditure (RE)}$$

- (b) Capital Deficit denotes the difference between capital receipts and capital disbursements.

$$\text{Capital Accounts Gap} = \text{Capital Account Deficit (CAD)} = \text{Capital Receipts (CR)} - \text{Capital Disbursements (CD)}$$

- (c) Conventional Deficit /Budgetary Deficit or overall Deficit is the difference between overall receipts and overall expenditure, both revenue and capital.

$$\text{Overall Gap} = \text{RD} + \text{CAD} = (\text{RR} - \text{RE}) + (\text{CR} - \text{CD}) = [(\text{RR} + \text{CR}) - (\text{RE} + \text{CD})]$$

- d) Gross Fiscal Deficit (GFD) is the difference between aggregate disbursements net of debt repayments and recovery of loans and revenue receipts and non-debt capital receipts.

$$\text{Gross Fiscal Deficit (GFD)} = \text{RE} + [\text{CD} - \{\text{Discharge of Internal Debt (DID)} + \text{Repayments of Loans to Centre (RLC)} + \text{Recoveries of Loans \& Advances (RLA)}\}] - \text{RR}$$

(e) Gross Primary Deficit (GPD) is defined as Gross Fiscal Deficit (GFD) minus interest payments.

$$\text{Primary Deficit (PD)} = \text{GFD} - \text{Interest Payment}$$
