**REPORT ON MONTHLY**  
**INDEX OF INDUSTRIAL PRODUCTION**  
**FOR THE MONTH OF APRIL, 2017**  
*(Base Year : 2004-05)*

Index of Industrial Production (IIP) is of immense use for understanding the industrial development of a State/Territory. The index indicates relative changes over a period of time in the volume of production in non-agricultural commodities and it is an effective tool to measure the trend of current Industrial Production. At the National level, the index of industrial production is being compiled by the Central Statistics Office, Government of India and is released on monthly basis. As far as the Union Territory of Puducherry is concerned, only annual indices are compiled and published so far. The present report on "Monthly Index of Industrial Production for the Month of April, 2017" brought out by the Directorate is first of its kind.

For the purpose of compiling the monthly index, the industrial sector has been divided into manufacturing and electricity sectors with the weights of 990.34 and 9.66 respectively out of total weight 1000. The manufacturing sector has further been divided into 19 major industrial groups at 2 digit level excluding electricity.

**SALIENT FEATURES:**

The General monthly Index for the month of April 2017 stands at 191.7. The Indices of Industrial production for Paper and paper products, Rubber and plastic products and Food and beverages products for the month of April 2017 stand at 286.0, 254.1 and 189.6 respectively. Chemical and chemical products carries a weight of 191.50 among the industries groups in the Manufacturing sector, represented by 19 items. The Index for the textiles industries for the month of April 2017 stands at 26.0, which is lower as compared to the other items. The textile industry carries a weight of 29.78 among the industry groups in the Manufacturing sector.

The Index of Industrial Production at 2 digit level for the month of April 2017 may be seen in the following Table.

A graphical presentation of Index of Industrial Production for the month of April 2017 is given below:

Different industries have been classified on the basis of use-based classification of items produced by these industries to capture the performance of different industrial groups. On the analogy of the use-based classification adopted by Central Statistics Office, item basket of production has been classified into four main groups. These groups consisted of basic goods, capital goods, Intermediate goods and consumer goods. Consumer goods are further subdivided into consumer durable goods and consumer non-durable goods. Use based monthly index of Industrial Production will provide the information regarding the performance of above mentioned industries which are classified according to their product usage.

Performance of industrial groups as per Use Based Classification for the month of April 2017 has been presented in the following Table. As per Use-based classification, the Index of Industrial Production for Basic goods, Capital goods, Intermediate goods, Consumer durables and Consumer non-durables for the month of April 2017 stands at 171.2, 144.7, 227.1, 282.0 and 145.2 respectively.
