PREFACE

Agriculture, the primary sector, is playing a vital role in providing one of the basic necessities of human kind. The Agricultural Sector is the base for estimation of State Domestic Product under Secondary and Tertiary Sectors. So the data analysis and inference of reliable Agriculture Statistics and its accuracy is very important.

This report has been designed to serve the policy makers, dealing with preparation of production plans for food and other agriculture policies. This report provides data on Agriculture, Rainfall including seasonal conditions, prices of agricultural commodities and wages of agricultural labour. This report, fifty Seventh in its series, has been classified into 3 divisions, where Part-I briefly gives an account of population, rainfall and seasonal conditions, classification of area, area of crops irrigated and the area under all crops as well as production and yield particulars. Part-II contains summary tables of the Union Territory as a whole for the last five years enabling comparison over a period of time. Part-III of this publication presents region - wise statistics for the year under reference.

I wish to record my special appreciation to Thiru S.Rathinavelu, Deputy Director and his dedicated team with Thiru. A.Suresh, Statistical Officer and other officials of the Agricultural Statistics Section for their kind support in bringing this publication in time. Suggestions for the improvement of this publication are highly solicited.

Mahe is situated near Tellicherry, geographically between Kozhikode and Cannanore District of Kerala at a distance of 850 Kms from Puducherry. Yanam is situated on the East Coast geographically as an enclave of East Godavari District of Andhra Pradesh and politically forming part of the U.T. of Puducherry at a distance of 870 Kms (North) from Puducherry. The Union Territory of Puducherry (UTP) consists of two districts viz., Puducherry District comprising of Puducherry, Mahe and Yanam regions and Karaikal District comprising of Karaikal region.

The Quick Estimates of GSDP of Puducherry in 2018-19 has been worked out to Rs.36656.43 Crores at current prices. STATISTICAL SCENARIO IN THE U.T.

With the increasing involvement of the state in welfare activities, there is a growing need for statistics in all productive activities and their presentation in a meaningful framework to facilitate decision making. This led to the creation of Directorates of Economics and Statistics (DES) in all States and Union Territories. For the purpose of co-ordination of Statistical activities of the Union Territory of Puducherry and for the promotion of Statistical standards, the Directorate of Economics and Statistics was set up in August 1957 in the U.T of Puducherry.

The main thrust of the Directorate in the initial years was to serve as a focal point of information on various subject matter fields of statistics. DES has been declared as Nodal Agency for all the statistical activities of the Union Territory of Puducherry during 1982. Since then DES is acting as the Nodal Agency and Statistical Authority for developing and managing the statistical system in the Union Territory.

The Directorate has witnessed continuous growth over the years and the responsibilities of the Directorate both in terms of scope and nature of work has increased considerably. The Statistical Science has assumed paramount importance for socio-economic planning and policy formulation in recent years. DES plays a key role in building up of a sound data base covering various sectors of the U.T economy and provides valuable inputs for planning and policy formulation.

The Directorate of Economics and Statistics, Government of Puducherry is declared as the State Agricultural Statistics Authority (SASA) and the scheme viz “ Collection of Agricultural Statistics” is being implemented in Puducherry Region since 1961-62 and in phases this scheme was extended to the other three regions of the Union Territory of Puducherry. The Field Supervisors of this Directorate, are responsible for the collection of field level statistics in the three seasons of an agricultural year. These primary workers visit each and every plot and collect “Land Utilization Statistics” with the help of village maps supplied by the Revenue Department, Puducherry. The supervisory staff of the Directorate provide able guidance to the primary enumerators in carrying out their work successfully and scientifically.

WAGES PAID TO AGRICULTURAL LABOURERS

Statistics relating to daily wages paid to agricultural and skilled labourers are collected every month from four selected centres at Puducherry region, two selected centres at Karaikal region and one selected centre at Yanam region of the Union Territory of Puducherry. The agricultural labourers are mainly classified into two groups.

viz., i) Field Labourers and ii) Skilled labourers.

Field labourers comprise of Ploughmen, Sowers, Transplanters, Weeders, Reapers and Harvesters. Skilled labourers are Carpenters and Blacksmiths. Data regarding average daily wages paid to agricultural labourers during 2018-19 in Puducherry, Karaikal and Yanam regions are detailed in the tables VII-A, VII- B and VII-C (at page No.45-46,47). The summary table consists of the average daily wages in respect of the Union Territory of Puducherry. The index numbers of agricultural wages are also given in a separate table taking the agricultural year 2007-08 as base year.

The average daily wages paid to each category of labourers had been computed with simple arithmetic mean of the wage rates that prevailed in the seven selected centers on the last working day of every month during the year 2018-19. The base year average of daily wages has been worked out with the simple average of all the months of the year 2007-08.

The index of area under all crops shows a mixed trend due to unstable cropping pattern followed by ryots and availability of water. In 2018-19 the index is 71.90.as compared to 69.74 in 2017-18.

The index of net area sown also varied from year to year. It was 96.27 in 2007-08 whereas in 2018-19 it was 72.19.

The index of yield per hectare crossed the 100 mark for the past nine years, which is a good sign of improvement. The current year 2018-19 the index number is 129.52.
