PUDUCHERRY**

# SEASON AND CROP REPORT 2024-25

**Shri. PANKAJ KUMAR JHA**  
**Resident Commissioner-cum-Secretary**  
**(Economics and Statistics)**

Chief Secretariat,  
No.1, Goubert Avenue,  
Puducherry – 605 001.

## **FOREWORD**

I am happy to note that the Directorate of Economics and Statistics is bringing out the 63<sup>rd</sup> publication of "*Season and Crop Report*" for the Agricultural Year 2024 - 25 (July-June). I am sure that this publication will be useful to ascertain the area and production particulars of various crops and make comparisons with previous years and thereby useful to the policy makers. Detailed data on rainfall, classification of land use statistics, irrigation data, production and yield particulars of all crops are furnished in this report which will also be helpful to the Policy Makers, Academicians and Farmers.

I appreciate the efforts of the Officers and Officials in bringing out this publication in time.

(PANKAJ KUMAR JHA, IAS)  
Resident Commissioner-cum-Secretary  
(Economics and Statistics)

Puducherry,  
March, 2026

## **PREFACE**

Agriculture, the primary sector, is playing a vital role in providing one of the basic necessities of human kind. The Agricultural Sector is the base for estimation of State Domestic Product under Secondary and Tertiary Sectors. So, the data analysis and inference of reliable Agriculture Statistics and its accuracy is very important.

This report has been designed to serve the policy makers, dealing with preparation of production plans for food and other agriculture policies. This report provides data on Agriculture, Rainfall including seasonal conditions, prices of agricultural commodities and wages of agricultural labour. This report, sixty third in its series, has been classified into 3 divisions, where Part-I briefly gives an account of population, rainfall and seasonal conditions, classification of area, area of crops irrigated and the area under all crops as well as production and yield particulars. Part-II contains summary tables of the Union Territory as a whole for the last five years enabling comparison over a period of time. Part-III of this publication presents region - wise statistics for the year under reference.

I wish to record my special appreciation to the dedicated team of officers and officials of the Agricultural Statistics Section for their kind support in bringing out this publication in time. Suggestions for the improvement of this publication are highly solicited.

(RATNAGHOSH KISHOR CHAURE)  
DIRECTOR

| XV                                | Net Area Irrigated in U.T. of Puducherry (All Regions) from 1958-59 to 2023-24                         | 84 - 88 |

## PART – I

### Highlights for the year 2024-25

- ❖ The Geographical Area of the U.T. of Puducherry is 48,651 hectares.
- ❖ U.T. of Puducherry has recorded 9,464.0 mm of rainfall in the Agricultural year 2024-25.
- ❖ Classification of Area:
- ❖ “Forests” covers 0.79% of the total geographical area, while “Land put to non-agricultural uses” has registered to 43.01%.
- ❖ “Current fallow” accounted to 7.81% and “Culturable waste” is recorded as 9.46% and “Other fallow lands” has accounted to 6.26 % to the total geographical area.
- ❖ Total Cropped area sown has stood at 26,223 hectares and the total cropped area of Food crops has stood at 20,137 hectares.
- ❖ “Food crops” has a share of 76.79% while “Non-Food crops” has a share of 23.21% of the total cropped area.
- ❖ Net area sown has registered as 14,523 hectares for the U.T. of Puducherry.
- ❖ Cropping intensity for the U.T. of Puducherry has stood at 1.80.
- ❖ Gross Area irrigated for all the crops is 22,238 hectares accounting to 84.80 % of Gross area sown.
- ❖ Net area irrigated totaled to 13,789 hectares accounting to 94.95 % of Net area sown.
- ❖ Out of 13,789 of Net area irrigated, 4,477 hectares (32.47%) irrigated by canals, 9,277 hectares (67.28%) by Tube wells and 35 hectares (0.25%) by other sources.

- ❖ Paddy cultivation encompasses 17,043 hectares (64.99%) of the total cultivated area with a production of 70,573 metric tonnes.
- ❖ Yield of Paddy crop in terms of rice has stood at 2,761 kg/ha with a production of 47,049 metric tonnes.
- ❖ Sugarcane area has stood at 750 hectares and the production is estimated to 92,250 metric tonnes.
- ❖ Area under coconut cultivation stood at 1,797 hectares.
- ❖ The wholesale prices of essential commodities collected from Puducherry and Karaikal markets are also incorporated for reference.
- ❖ As per Tenth Agriculture Census report (2015-16), U.T. of Puducherry has 33,840 holdings with an operating area of 20,864 hectares.
- ❖ Marginal farmers had accounted for 28,361 holding while small farmers accounted for 3,385 holdings.

# INTRODUCTION

Agriculture plays a vital role in the economy by ensuring food security and providing livelihood to a large section of the population. The performance of the agricultural sector largely depends on seasonal rainfall, climatic conditions, availability of irrigation facilities, and adoption of improved farming practices. Monitoring seasonal agricultural activities is therefore essential for planning and policy formulation.

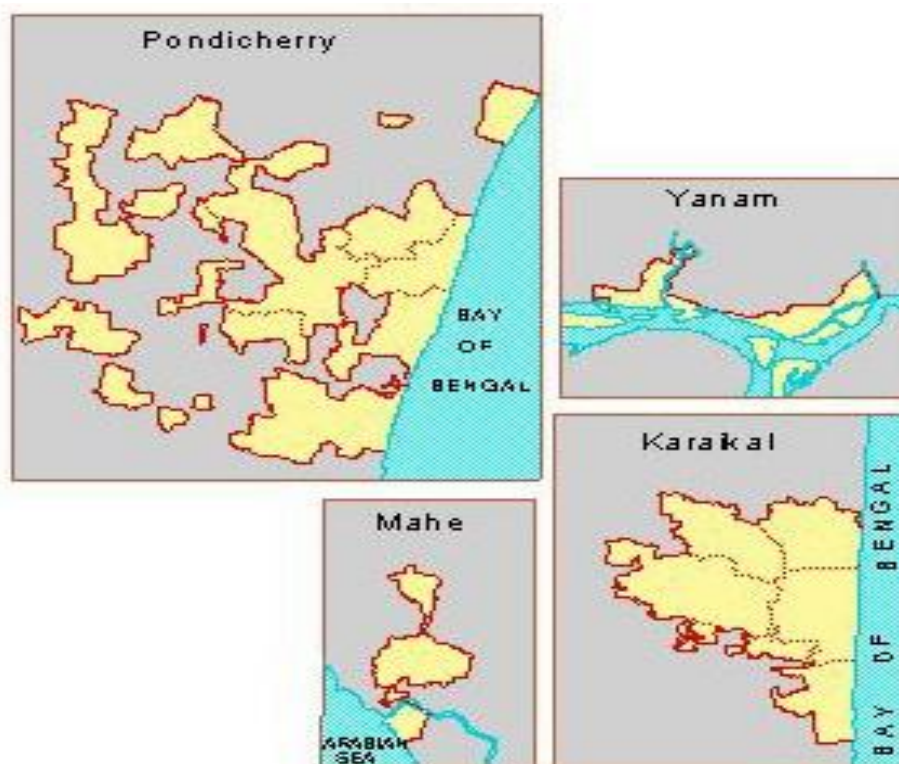

The **Season and Crop Report** is an important statistical publication that presents comprehensive statistical record of the Union Territory's agricultural performance over a specific agricultural year. This publication includes detailed data on rainfall Status, Land Utilization ie., Nine Fold Classification of land, sources of Irrigation, Area, Yield and Production for principal food and non-food crops categorizing based on the three seasons ie., Khariff, Rabi-I and Rabi-II, trends in wholesale prices of commodities and wages paid to Agricultural Labourers.

This report serves as a valuable reference for administrators, planners, researchers, and policymakers by providing insights into crop performance across different seasons such as **Kharif, Rabi-I and Rabi-II**. The data presented in this report help in assessing the overall agricultural performance and in formulating strategies for improving agricultural productivity.

# EXECUTIVE SUMMARY

Puducherry, a small Union Territory extends over an area of 486.51 Sq. Km. It comprises of four geographically non-contiguous regions namely Puducherry, Karaikal, Mahe and Yanam. Puducherry, the capital of the U.T. is on the East Coast and South of Chennai at a distance of 165 Km. Karaikal lies at 137 Km South of Puducherry. Mahe is situated in India's West coast and is geographically between Kozhikode District and Kannur District of Kerala at a distance of approximately 610 Km from Puducherry and 10 km from Thalassery. Yanam is located on the East Coast of India. Geographically, it serves as an enclave of East Godavari District of Andhra Pradesh and politically forming part of the U.T. of Puducherry at a distance of 780 Km North from Puducherry. The Union Territory of Puducherry (UTP) consists of two districts viz., Puducherry District comprising of Puducherry, Mahe and Yanam regions and Karaikal District comprising of Karaikal region.

## **GROSS STATE DOMESTIC PRODUCT (GSDP)**

The Revised Estimates of GSDP of Puducherry in 2024-25 has been worked out to Rs.52,775.17 Crores at current prices. The per capita income (on the base of NSDP current) for the year 2024-25 (Revised Estimates) has been estimated at Rs. 285072/-. The sectoral composition of the GSDP at current prices in 2024-25 (Revised Estimates) indicates that the percentage share of Primary, Secondary and Tertiary sectors as 5.54%, 41.56% and 52.91% respectively.

## **STATISTICAL SCENARIO IN THE U.T. OF PUDUCHERRY**

With the increasing involvement of the state in welfare activities, there is a growing need for statistics on all productive activities and their presentation within a meaningful framework to facilitate decision making. This led to the creation of Directorates of Economics and Statistics (DES) in all States and Union Territories. For the purpose of co-ordination of Statistical activities of the Union Territory of Puducherry and for the promotion of Statistical standards, the Directorate of Economics and Statistics was set up in August 1957 in the U.T of Puducherry as the Bureau of Economics and Statistics.

The main thrust of the Directorate in the initial years was to serve as a focal point of information on various fields of Statistics. DES has been declared as Nodal Agency for all the statistical activities of the Union Territory of Puducherry in April 1982. Since then, DES is acting as the Nodal Agency and Statistical Authority for developing and managing the statistical system in the Union Territory.

The Directorate has witnessed continuous growth over the years and the responsibilities of the Directorate both in terms of scope and nature of work has increased considerably. The Statistical Science has assumed paramount importance for socio-economic planning and policy formulation in recent years. DES plays a key role in building up of a sound data base covering various sectors of the U.T. economy and provides valuable inputs for planning and policy formulation.

The Directorate of Economics and Statistics, Government of Puducherry is declared as the State Agricultural Statistics Authority (SASA) and the scheme viz “ Collection of Agricultural Statistics” is being implemented in Puducherry Region since 1961-62 and in phases, this scheme was extended to the other three regions of the Union Territory of Puducherry. The Field Supervisors of this Directorate, are responsible for the collection of field level statistics in the three seasons of an agricultural year. These primary workers visit each and every plot and collect “Land Utilization Statistics” with the help of village maps supplied by the Revenue Department, Puducherry. The supervisory staff of the Directorate provide able guidance to the primary enumerators in carrying out their work successfully and scientifically.

## POPULATION

The population of the U.T of Puducherry as per 2011 Census was 12.48 lakhs and the Decadal Population growth rate is 28.08%. The density of population has increased from 769 persons per Sq. Km in 1961 to 2547 persons in 2011. The literacy rate has increased from 37.43% in 1961 census to 85.9% in 2011 census during the period of 50 years.

Of the Total Population, 6,12,511 persons were males and 6,35,442 persons were females, with a sex ratio of 1037 females to 1000 males. The regional break up figures with density of population are given below.

| <i><b>Region</b></i>      | <i><b>Population 2011 Census</b></i> |                       |                     | <i><b>Density per Sq.Km</b></i> |
|---------------------------|--------------------------------------|-----------------------|---------------------|---------------------------------|
|                           | <i><b>Males</b></i>                  | <i><b>Females</b></i> | <i><b>Total</b></i> |                                 |
| Puducherry                | 4,68,258                             | 4,82,031              | 9,50,289            | 3,232                           |
| Karaikal                  | 97,809                               | 1,02,413              | 2,00,222            | 1,275                           |
| Mahe                      | 19,143                               | 22,673                | 41,816              | 4,646                           |
| Yanam                     | 27,301                               | 28,325                | 55,626              | 1,854                           |
| <b>U.T. of Puducherry</b> | <b>6,12,511</b>                      | <b>6,35,442</b>       | <b>12,47,953</b>    | <b>2,547</b>                    |

The rural population is 3,95,200 persons (31.67%) whereas the urban population is 8,52,753 persons which constitutes (68.33%) of the total population. The percentage of rural population had decreased from 33.43% to 31.67% compared to previous census.

The following table reveals the available working force in the U.T. of Puducherry as per 2011 Census.

| <b>Region</b>             | <b>Total workers</b> | <b>Agricultural Workers</b> | <b>% of Agri. Workers to the total workers</b> | <b>Net Area sown 2024-25</b> |
|---------------------------|----------------------|-----------------------------|------------------------------------------------|------------------------------|
| Puducherry                | 3,48,105             | 61,301                      | 17.61                                          | 9,205                        |
| Karaikal                  | 68,301               | 15,449                      | 22.62                                          | 4,440                        |
| Mahe                      | 11,802               | 125                         | 1.06                                           | 493                          |
| Yanam                     | 16,760               | 3,615                       | 21.57                                          | 385                          |
| <b>U.T. of Puducherry</b> | <b>4,44,968</b>      | <b>80,490</b>               | <b>18.09</b>                                   | <b>14,523</b>                |

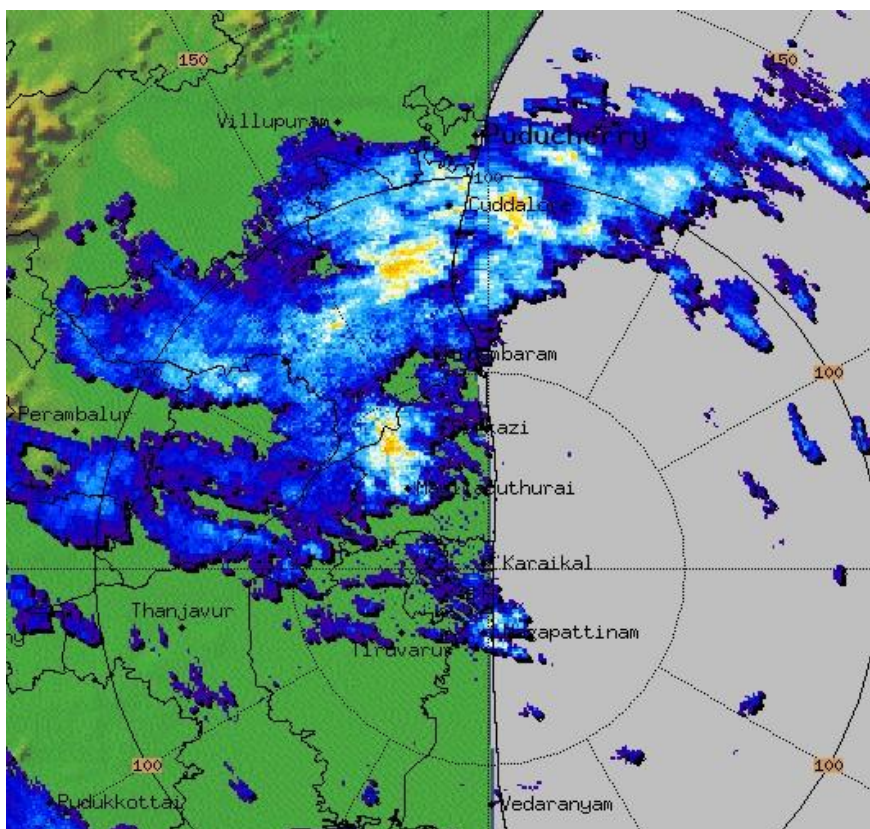

The total Population of the Union Territory of Puducherry is 12,47,953 persons and out of this 4,44,968 (35.66%) are classified as workers. Agriculture Sector of the U.T. of Puducherry had employed 80,490 persons who are either Cultivators or Agricultural Labourers.

## **RAINFALL AND SEASONAL CONDITION**

The Union Territory of Puducherry receives rainfall both from “South – West monsoon” and “North–East monsoon.”

The monsoon period (June to May) is divided into four seasons namely,

- (i) South–West monsoon
- (ii) North–East monsoon
- (iii) Winter period
- (iv) Hot weather period.

## **SOUTH–WEST MONSOON (JUNE 2024 TO SEPTEMBER 2024)**

This season’s rainfall plays a vital role in the production of Khariff Crops. Mahe region which is located in the West coast of Kerala State receives its major rainfall during this season. The region–wise rainfall during the South-West monsoon season is given below.

| <i><b>Name of the Region</b></i> | <i><b>Number of Rainy days</b></i> | <i><b>Total rainfall (in mm)</b></i> | <i><b>Normal rainfall (in mm)</b></i> |
|----------------------------------|------------------------------------|--------------------------------------|---------------------------------------|
| Puducherry                       | 27                                 | 536.0                                | 389.6                                 |
| Karaikal                         | 13                                 | 162.8                                | 277.9                                 |
| Mahe                             | 88                                 | 2751.4                               | 2438.0                                |
| Yanam                            | 47                                 | 1022.4                               | 662.5                                 |

It may be noted that Puducherry, Mahe and Yanam regions had recorded a higher level of rainfall while compared to normal rainfall during the season whereas Karaikal region had recorded lesser level of rainfall as compared to its normal rainfall.

## **NORTH-EAST MONSOON (OCTOBER 2024 TO DECEMBER 2024)**

The region-wise rainfall during the North-East Monsoon season is shown in the following table:

| <i><b>Name of the Region</b></i> | <i><b>Number of Rainy days</b></i> | <i><b>Total rain fall (in mm)</b></i> | <i><b>Normal rainfall (in mm)</b></i> |
|----------------------------------|------------------------------------|---------------------------------------|---------------------------------------|
| Puducherry                       | 27                                 | 1132.8                                | 884.9                                 |
| Karaikal                         | 39                                 | 1377.6                                | 1003.9                                |
| Mahe                             | 20                                 | 437.0                                 | 404.3                                 |
| Yanam                            | 16                                 | 343.6                                 | 438.7                                 |

During this season, Puducherry, Karaikal and Mahe regions received more rainfall than normal, whereas Yanam region in the U. T. of Puducherry had received less level of rainfall as compared to its normal rainfall.

## **WINTER PERIOD (JANUARY 2025 - FEBRUARY 2025)**

The region – wise rainfall during the winter season is presented in the following table:

| <i><b>Name of the Region</b></i> | <i><b>Number of Rainy days</b></i> | <i><b>Total rainfall (in mm)</b></i> | <i><b>Normal rainfall (in mm)</b></i> |
|----------------------------------|------------------------------------|--------------------------------------|---------------------------------------|
| Puducherry                       | 1                                  | 5.0                                  | 35.6                                  |
| Karaikal                         | 5                                  | 132.6                                | 59.4                                  |
| Mahe                             | 1                                  | 28.0                                 | 7.6                                   |
| Yanam                            | 0                                  | 0                                    | 19.3                                  |

During this season, two regions Karaikal and Mahe regions had received higher level of rainfall as compared to their normal rainfall whereas Puducherry region had recorded lesser level of rainfall as compared to its normal rainfall. Yanam region had no rainfall during this season.

## **HOT-WEATHER PERIOD (MARCH 2025 TO MAY 2025)**

The above season's rainfall details are given in the following table.

| <i><b>Name of the Region</b></i> | <i><b>Number of Rainy days</b></i> | <i><b>Total rainfall (in mm)</b></i> | <i><b>Normal rainfall (in mm)</b></i> |
|----------------------------------|------------------------------------|--------------------------------------|---------------------------------------|
| Puducherry                       | 8                                  | 136.0                                | 89.5                                  |
| Karaikal                         | 12                                 | 249.2                                | 98.0                                  |
| Mahe                             | 23                                 | 1005.0                               | 323.5                                 |
| Yanam                            | 11                                 | 144.6                                | 74.8                                  |

During the above season, all the four regions of U.T. of Puducherry had received more rainfall than the normal rainfall.

## **RAINFALL ABNORMALITIES**

The rainfall abnormalities are classified as follows

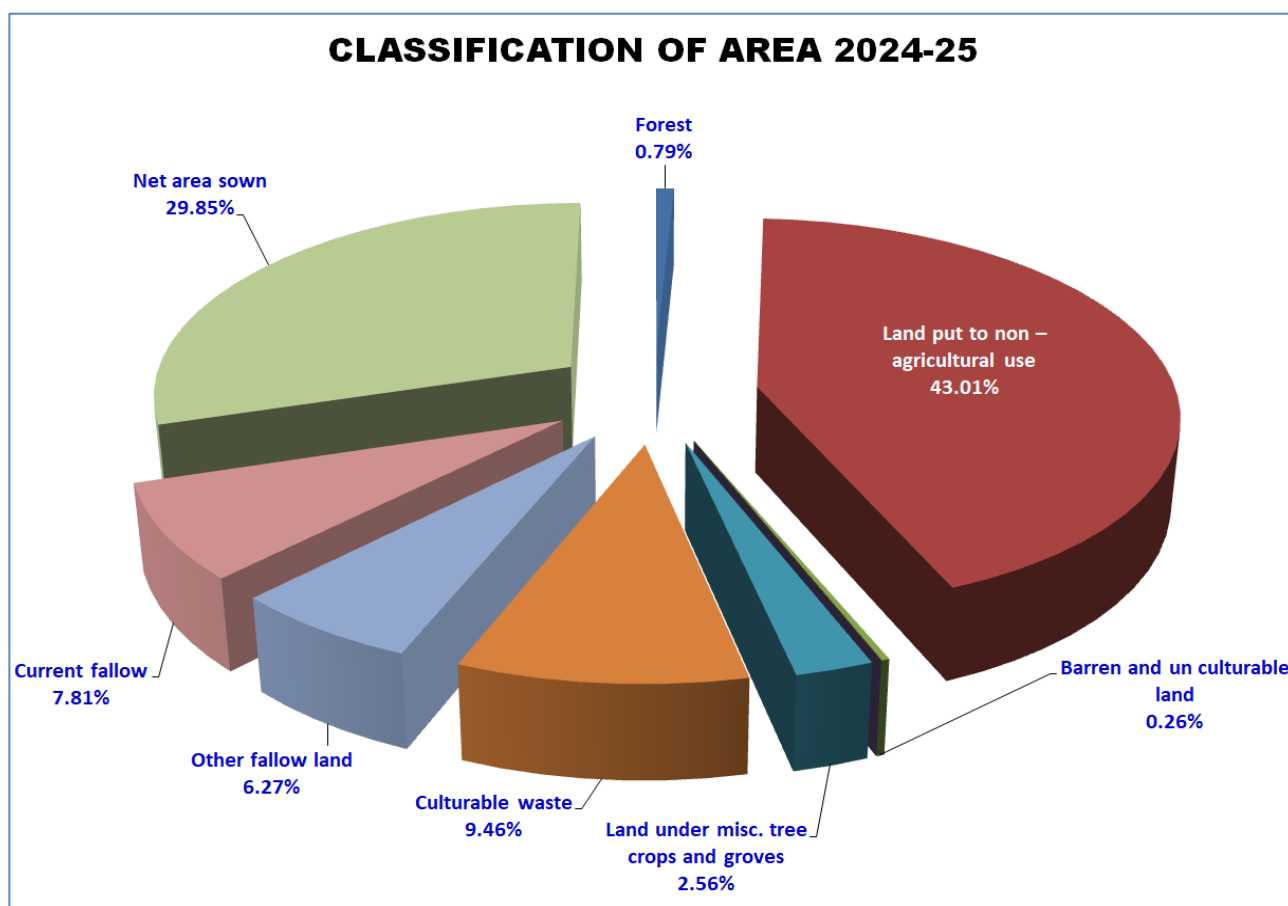

- i) Excess (+) 20% and above
- ii) Normal (+) 19.9% to (-) 19.9%
- iii) Deficient (-) 20% to (-) 59.9%
- iv) Scanty (-) 60% to (-) 99.9%
- v) No rain (-) 100%

## **CLASSIFICATION OF AREA**

The total geographical area of the Union Territory of Puducherry is 486.51 Sq. Km, which is classified into nine categories.

The following table gives the nine fold classification of land utilization and the area under each category with its respective percentage to the total geographical area.

| Sl.No. | Category                                  | 2024-25         |                                       |
|--------|-------------------------------------------|-----------------|---------------------------------------|
|        |                                           | Area in Hectare | Percentage to total Geographical area |
| 1.     | Forest                                    | 384             | 0.79                                  |
| 2.     | Land put to non – agricultural use        | 20923           | 43.01                                 |
| 3.     | Barren and un culturable land             | 125             | 0.26                                  |
| 4.     | Permanent pastures and other grazing land | 0               | 0.00                                  |
| 5.     | Land under misc. tree crops and groves    | 1246            | 2.56                                  |
| 6.     | Culturable waste                          | 4603            | 9.46                                  |
| 7.     | Other fallow land                         | 3048            | 6.26                                  |
| 8.     | Current fallow                            | 3799            | 7.81                                  |
| 9.     | Net area sown                             | 14523           | 29.85                                 |

# CONCEPTS AND DEFINITIONS

## FOREST

Lands classified as “Forest” under any legal enactment are dealing with forests or administered as forests whether, State owned or private. During the year 2024-25, area under this category was 384 hectares (0.79 %) of the total geographical area as declared by the Department of Forest, Government of Puducherry.

## LAND PUT TO NON-AGRICULTURAL USE

All lands occupied by Buildings, Paths, Roads, Railways, Rivers, Ponds, Lakes, Canals and other lands put to non-agricultural purposes are brought under this category.

During the year 2024-25, area under this category was 20,923 hectares (43.01%) of the total geographical area, which was 20,516 hectares in the previous year 2023-24, which shows 0.84% higher when compared to 2023-24.

## BARREN AND UNCULTURABLE LANDS

Land where cultivation is not at all possible comes under this category. During the year 2024-25, 125 hectares (0.26%) were under this category.

## PERMANENT PASTURES AND OTHER GRAZING LANDS

All grazing lands, whether they are permanent pastures or meadows are considered as permanent pastures and other grazing lands according to their nature. Like in previous year 2023-24, no area was recorded under this category during the year 2024-25.

## **LAND UNDER MISCELLANEOUS TREE CROPS & GROVES**

Lands in which trees and groves are grown which are not included in the net area sown come under this category. An area of 1,246 hectares (2.56%) was recorded under this category. This shows an increase of 96 hectares under this category when compared to the last agricultural year.

## **CULTURABLE WASTE**

All lands available for cultivation whether taken up for cultivation or not taken up for cultivation once, but not cultivated during the current year and continuously for the last five years or more, in succession for one reason or the other, are classified as culturable waste. During the year 2024-25, an area of 4,603 hectares has been recorded under this category, which constitutes 9.46% of the total geographical area. This shows a decrease of 132 hectares when compared to the previous year 2023-24.

## **OTHER FALLOW LANDS**

All lands, which are usually taken up for cultivation but are temporarily suspended from cultivation for a period of not less than one year and not more than five years are considered as other fallow lands. An area of 3,048 hectares has been recorded during the year 2024-25 under this category which is 6.26% of the total geographical area.

## **CURRENT FALLOWS**

Cultivable lands, which are kept fallow during the entire period under review, are known as current fallows. During 2024-25, lands under this category were recorded as 3,799 hectares which is 7.81%.

## **NET AREA SOWN**

Net area sown represents the area sown with crops at least once in any of the crop season of the year, area sown more than once in the same year, will count only once. The net area sown in the current year 2024-25 was 14,523 hectares as (29.85 %) against 16,274 hectares (33.45 %) recorded last year (2023-24) which is a decrease of 1751 hectares (3.6 %).

The table below represents the region-wise distribution of Net Area Sown to their respective geographical area for the year 2024-25.

| Sl. No. | Region     | Cropped details                             |                                               |
|---------|------------|---------------------------------------------|-----------------------------------------------|
|         |            | % of NAS to Geographical area of the region | % regional cropped area to total cropped area |
| 1.      | Puducherry | 31.33                                       | 70.34                                         |
| 2.      | Karaikal   | 27.73                                       | 25.94                                         |
| 3.      | Mahe       | 56.67                                       | 1.88                                          |
| 4.      | Yanam      | 16.10                                       | 1.84                                          |

The following table shows the region-wise intensity of total cropped area to net area sown.

| Sl. No. | Name of the region | Percentage of region-wise total cropped area to Net area sown |
|---------|--------------------|---------------------------------------------------------------|
| 1.      | Puducherry         | 200.37                                                        |
| 2.      | Karaikal           | 153.24                                                        |
| 3.      | Mahe               | 100.00                                                        |
| 4.      | Yanam              | 125.19                                                        |

## TOTAL CROPPED AREA (GROSS CROPPED AREA)

The total cropped area under all crops was 26,223 hectares (Food crops 20,137 hectares & Non-food crops 6,086 hectares) in 2024-25 which is a decrease by 4,193 hectares as compared to 2023-24. During the year 2024-25, the area under food crops accounted for 76.79 % and non-food crops 23.21 %.

The area sown more than once was reported as 11,700 hectares during 2024-25 as compared to 14,142 hectares during the year 2023-24, showing a decrease of 2,442 hectares.

## CROPPING INTENSITY

Cropping intensity is defined as the ratio between the Gross Area Sown and the Net Area Sown. In the UT of Puducherry, the cropping intensity for the year 2024-25 is 1.80. This metric provides insights into the level of agricultural activity and the extent to which cultivable land is utilized for multiple crops within a given period.

## AREA IRRIGATED BY DIFFERENT SOURCES OF IRRIGATION

The Net Area Irrigated by different sources of irrigation during the year 2024-25 is recorded as 13,789 hectares. In Puducherry region, 60.90% is irrigated to the total net area irrigated, while in Karaikal region the respective figure is 36.13%. The relevant figures for Mahe and Yanam regions are 0.18 % and 2.79 % respectively.

The following table shows the Net Area Irrigated by different sources of irrigation in respect of the Union Territory of Puducherry.

| Sl. No.      | Sources of Irrigation | Net Area Irrigated (in Hect) | Percentage    |
|--------------|-----------------------|------------------------------|---------------|
| 1            | Canal                 | 4,477                        | 32.47         |
| 2            | Tank                  | 0                            | 0             |
| 3            | Tubewell              | 9,277                        | 67.28         |
| 4            | Other Source          | 35                           | 0.25          |
| <b>Total</b> |                       | <b>13,789</b>                | <b>100.00</b> |

It may be noted that, out of 13,789 hectares of net area irrigated, a total of 4,477 hectares in Karaikal & Yanam regions were irrigated through canals. In Puducherry region the main source of irrigation was “Tube Wells” and the area irrigated through “Tube Wells” in the U.T of Puducherry was 9,277 hectares, of which Puducherry region occupied 8,397 hectares under Tube Wells irrigation.

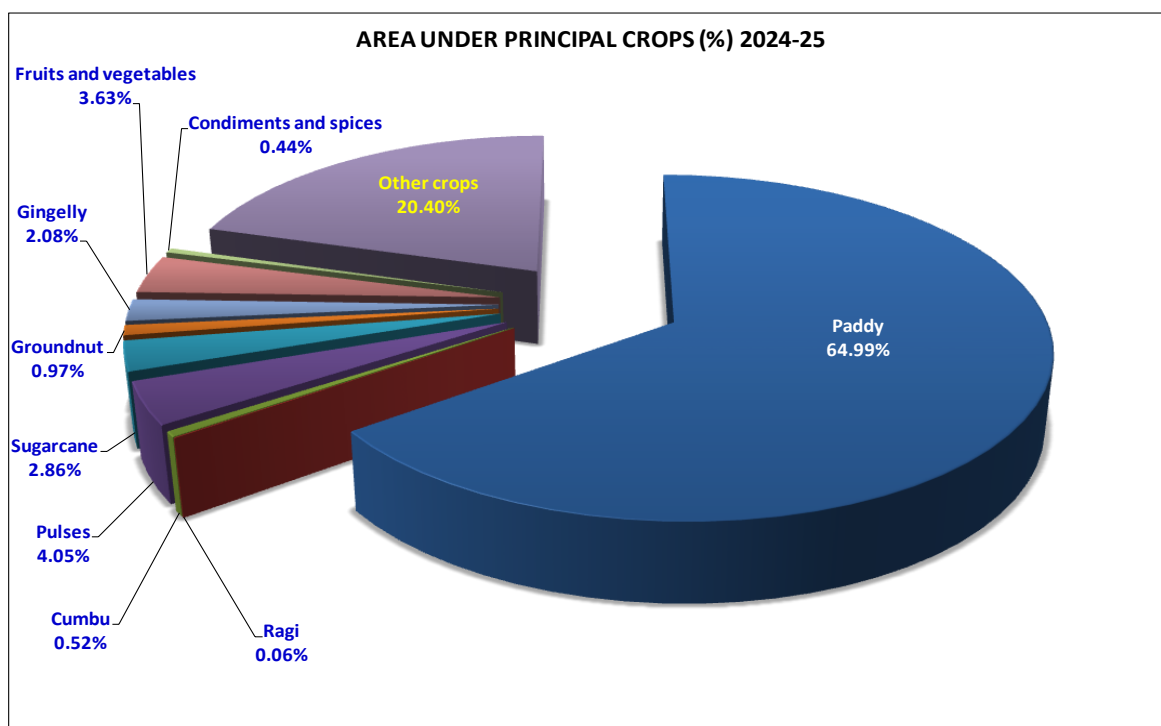

During the year 2024-25, the Gross area irrigated under different sources of irrigation was 22,238 hectares as against 25,951 hectares in 2023-24. Percentage of area irrigated to total cropped area was 84.80 % in the Union Territory of Puducherry. It is worth mentioning here that 86.53 % of the total cropped area in Puducherry region alone as irrigated whereas the figures for Karaikal, Mahe and Yanam regions were 84.82 %, 5.07 % and 100 % respectively.

The following table shows the percentage of area under Principal crops to total area sown for 2024-25 in respect of Union Territory of Puducherry as a whole.

| <b>Principal Crops</b> | <b>% of area to the total area sown</b> | <b>Principal Crops</b> | <b>% of area to the total area sown</b> |
|------------------------|-----------------------------------------|------------------------|-----------------------------------------|
| Paddy                  | 64.99                                   | Groundnut              | 0.97                                    |
| Ragi                   | 0.06                                    | Gingelly               | 2.08                                    |
| Cumbu                  | 0.52                                    | Fruits and vegetables  | 3.63                                    |
| Pulses                 | 4.05                                    | Condiments and spices  | 0.44                                    |
| Sugarcane              | 2.86                                    | Other crops            | 20.40                                   |

## CROPPING PATTERN

Cropping Pattern pertains to the distribution of land area among various crops throughout the Agricultural year 2024-25. The accompanying chart and table depict the cropping pattern in the U.T. of Puducherry, highlighting the proportional allocation of land under Principal Crops in relation to the Total Cropped Area.

The cropping pattern in the Union Territory of Puducherry during 2023-24 and 2024-25 was as shown below: -

| Name of the crop            | Percentage of area under principal crops to total cropped area |              |
|-----------------------------|----------------------------------------------------------------|--------------|
|                             | 2023-24                                                        | 2024-25      |
| <b>Food-Crops</b>           |                                                                |              |
| Paddy                       | 64.34                                                          | 64.99        |
| Ragi                        | 0.10                                                           | 0.06         |
| Cumbu                       | 0.35                                                           | 0.52         |
| Pulses                      | 3.69                                                           | 4.05         |
| Sugarcane                   | 4.03                                                           | 2.86         |
| Other food-crops            | 4.20                                                           | 4.31         |
| <b>Total Food Crops</b>     | <b>76.71</b>                                                   | <b>76.79</b> |
| <b>Non-Food Crops</b>       |                                                                |              |
| Cotton                      | 3.38                                                           | 3.36         |
| Groundnut                   | 1.21                                                           | 0.97         |
| Gingelly                    | 1.73                                                           | 2.08         |
| Coconut                     | 6.03                                                           | 6.85         |
| Casuarina                   | 2.55                                                           | 2.70         |
| Other Non-food crops        | 8.39                                                           | 7.25         |
| <b>Total Non-food crops</b> | <b>23.29</b>                                                   | <b>23.21</b> |

In Puducherry region, food crops occupied 70.88% of the total food cropped area whereas in Karaikal region it was 27.72% and in Mahe and Yanam regions the same were 0.44% and 0.96% respectively.

## PADDY

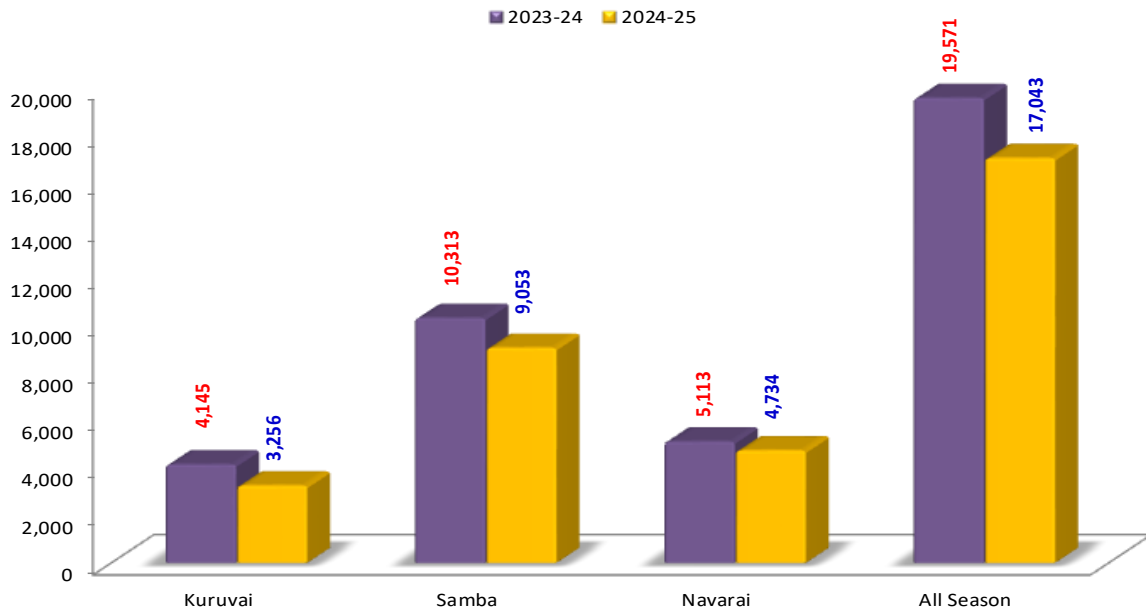

Paddy is the principal crop amongst all the crops and Paddy was raised in an area of 17,043 hectares during the year 2024-25 which accounted for 64.99% of the total cropped area. The area under Paddy in 2023-24 was 19,571 hectares. Production of Rice during 2024-25 was reported as 47,049 tonnes as against 61,306 tonnes in 2023-24. The average yield rate of rice was 2,761 Kgs. per hectare during 2024-25.

Percentage of area under Paddy to the total cropped area in respect of each region of Union Territory of Puducherry can be observed from the following table.

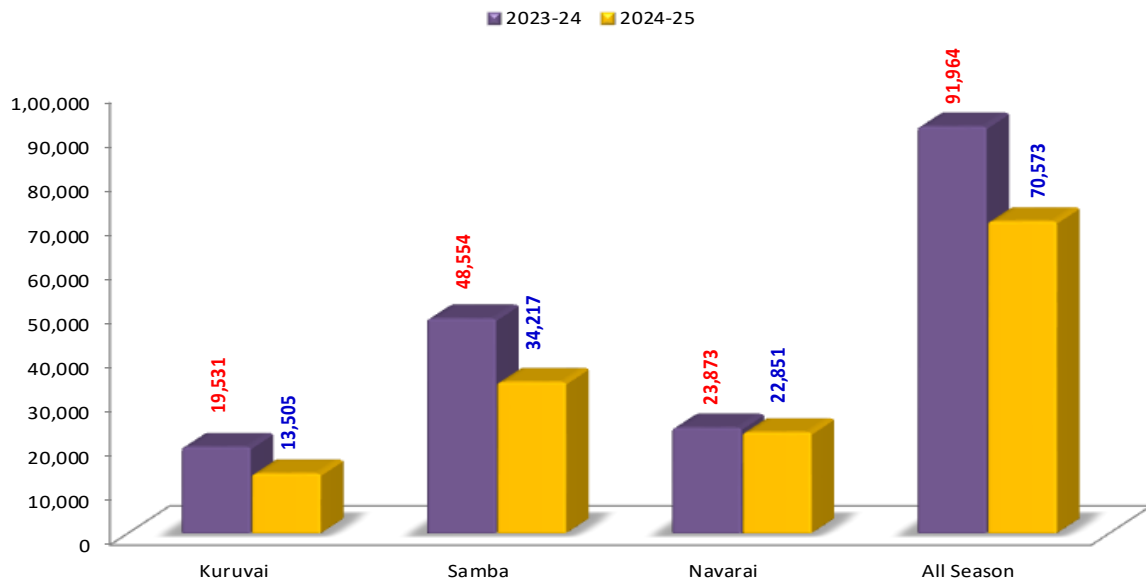

| Region     | Percentage of area under Paddy to total cropped area |
|------------|------------------------------------------------------|
| Puducherry | 64.90                                                |
| Karaikal   | 71.74                                                |
| Mahe       | 0                                                    |
| Yanam      | 39.83                                                |

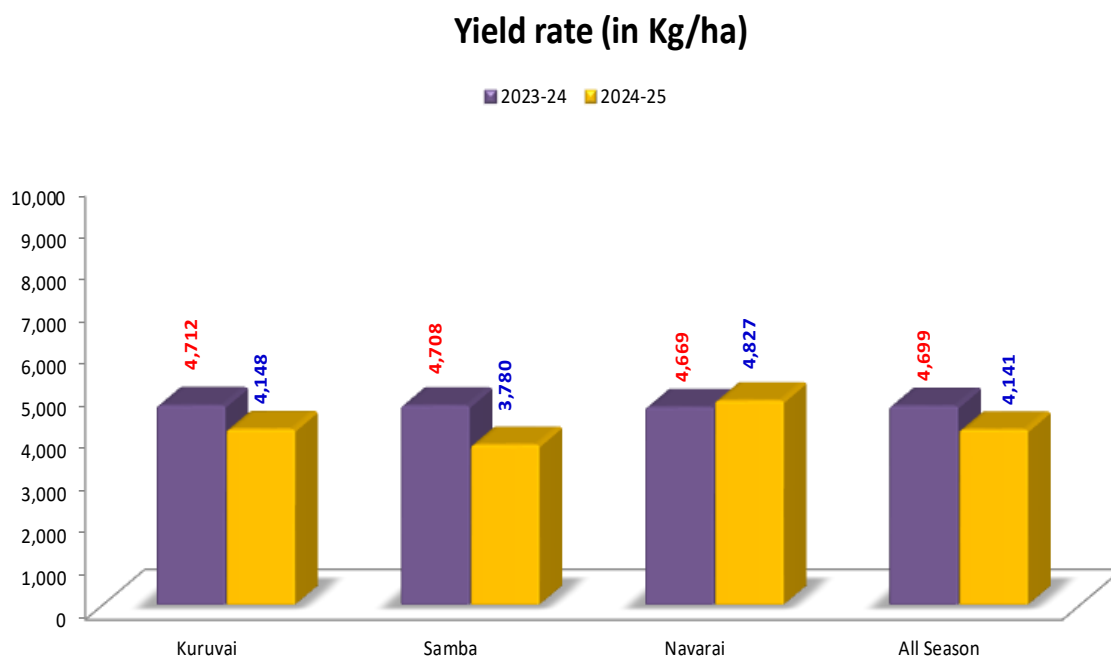

| Season              | Year    | Kuruvai | Samba  | Navarai | All Season |
|---------------------|---------|---------|--------|---------|------------|
| Area (in Hec)       | 2024-25 | 3,256   | 9,053  | 4,734   | 17,043     |
|                     | 2023-24 | 4,145   | 10,313 | 5,113   | 19,571     |

### Area (in Hec)

### Production (in MT)

Paddy is normally cultivated in wetlands, which are irrigated by different sources of irrigation such as Canals and Tube Wells. Usually Paddy is cultivated during three different seasons in a year. Paddy first crop (Kuruvai) is normally sown during the months of May to July and harvested during September to October. Paddy second crop (Samba), which is predominant, is sown during the period from August to October and harvested during December to February. The sowing season of Paddy third crop (Navarai) is sown from January to March and is harvested during May to June.

## RAGI

Ragi was cultivated in Puducherry region to an extent of 17 hectares. This crop is mainly sown in dry lands irrigated by tube wells.

The production was estimated at 51 tonnes. About 0.06% of total cropped area was utilized for Ragi cultivation.

## CUMBU

Cumbu was cultivated only in Puducherry region to an extent of 136 hectares in 2024-25 and the production was 408 tonnes. Cumbu is mainly sown in dry lands for three seasons viz. Khariff, Rabi-I and Rabi-II.

## OTHER MILLETS

Other Millets such as cholam and Thenai had been grown in Puducherry region alone to an extent of 2 hectares and 1 hectare respectively. The production of cholam and Thenai was estimated at 7 tonnes during the agricultural year under review.

## PULSES

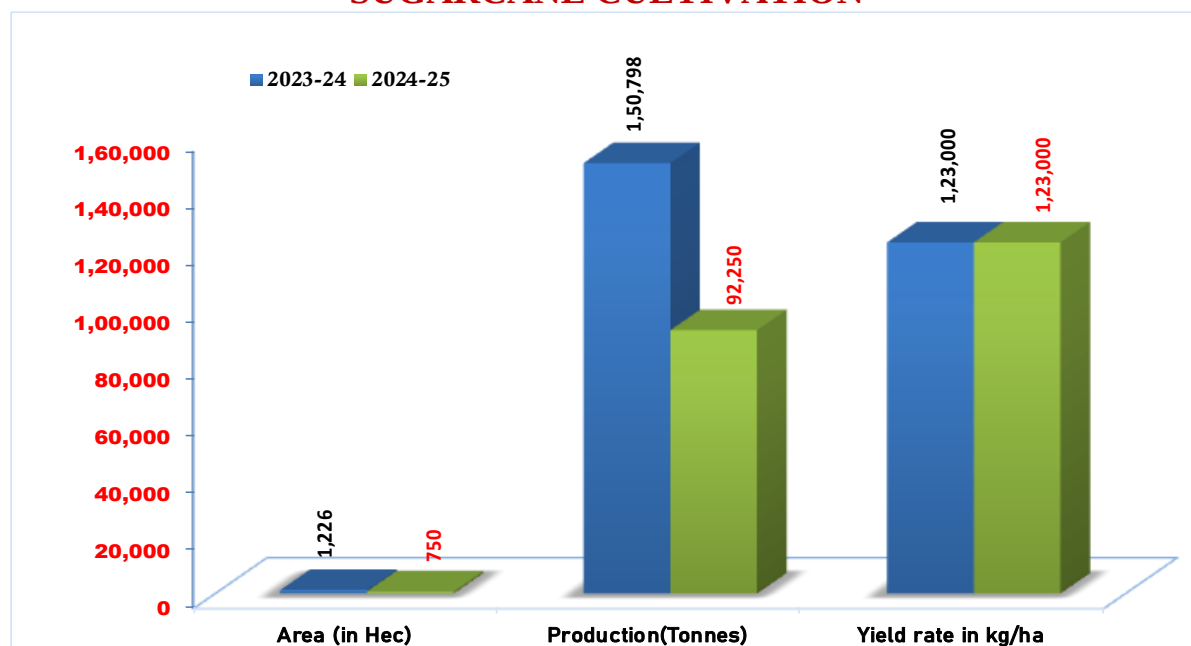

Pulses were cultivated in 1,061 hectares in the entire Union Territory and the Blackgram and Greengram occupied 510 hectares and 385 hectares respectively, other pulses (Karamani) occupied 166 hectares. The production of Blackgram was 340 tonnes and that of Greengram was 57 tonnes respectively. The production of other pulses was 150 tonnes.

## SUGARCANE

Sugarcane is the major crop among the commercial crops and grown in Puducherry region only. During the year 2024-25, Sugarcane was cultivated in 750 hectares. The production of Sugarcane during the year 2024-25 was estimated as 123 tonnes per hectare.

| <b>Year</b>         | <b>2024-25</b> | <b>2023-24</b> | <b>% vari</b> |
|---------------------|----------------|----------------|---------------|
| Area (in Hec)       | 750            | 1,226          | -38.82        |
| Production(Tonnes)  | 92,250         | 1,50,798       | -38.82        |
| Yield rate in kg/ha | 1,23,000       | 1,23,000       | 0             |

## SUGARCANE CULTIVATION

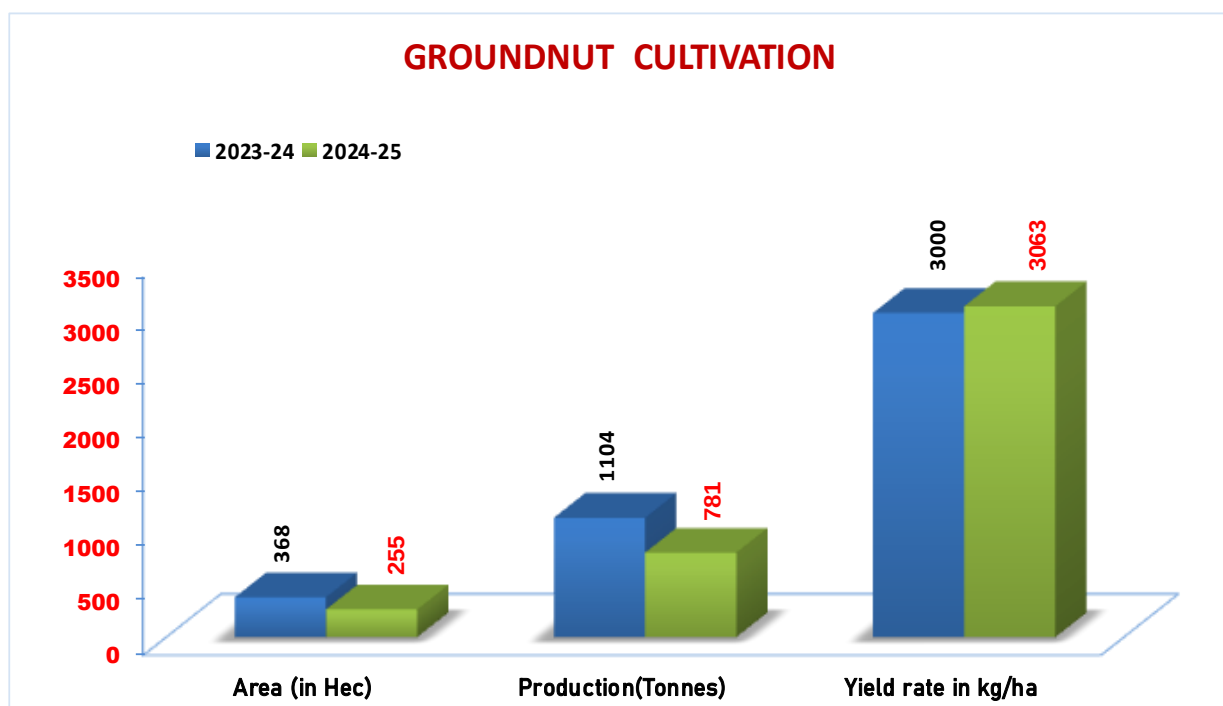

## COTTON

Cotton is the only fibre crop grown mainly in Karaikal region. During 2024-25 total area under Cotton was reported as 881 hectares of which 1 hectare was recorded in Puducherry region and 880 hectares was recorded in Karaikal region. Total out-turn of Cotton was reported as 1,848 metric tonnes.

## GROUNDNUT

Groundnut is one among the leading Oilseeds cultivated in the Union Territory of Puducherry. During the year 2024-25, the cropped area under Groundnut was reported as 255 hectares which is 0.97% of the total cropped area and the total production was estimated at 781 metric tonnes. Groundnut is sown as an irrigated crop during December to February and in July and August of a year.

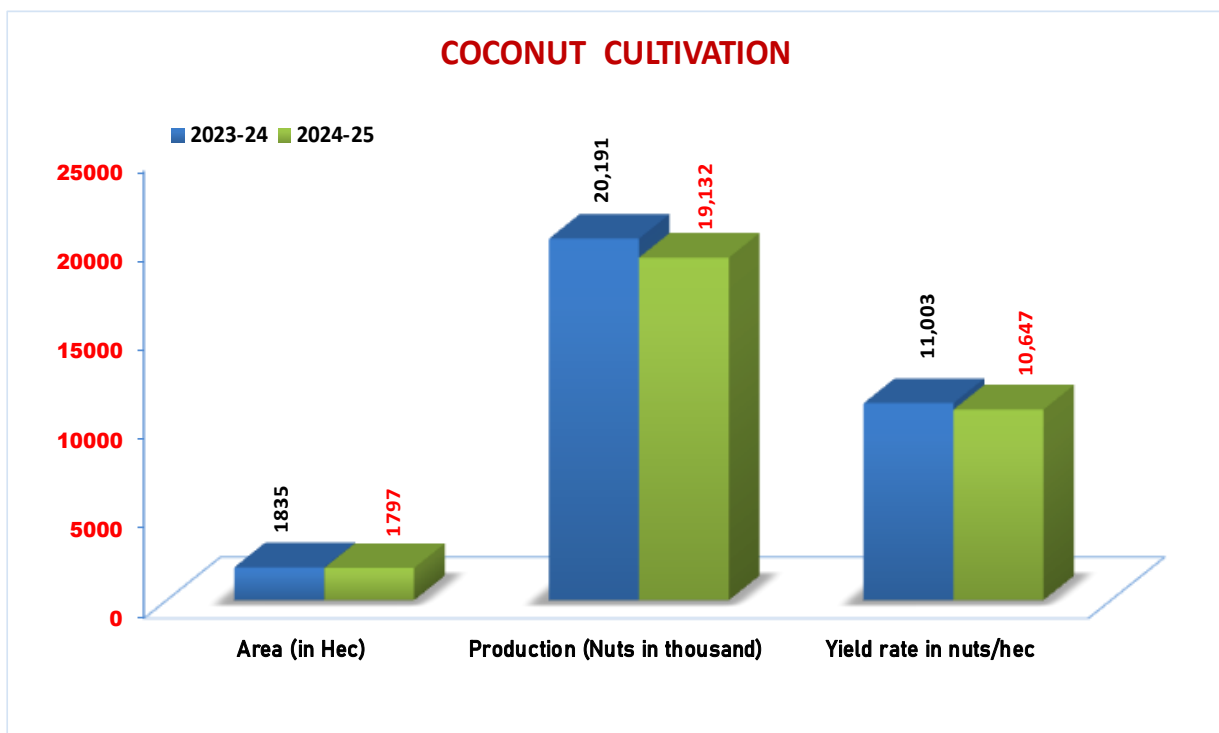

| Year                | 2024-25 | 2023-24 | % vari |
|---------------------|---------|---------|--------|
| Area (in Hec)       | 255     | 368     | -30.71 |
| Production (Tonnes) | 781     | 1104    | 29.26  |
| Yield rate in kg/ha | 3063    | 3000    | 2.10   |

## COCONUT

Coconut is another important oil seed crop, cultivated in 1,797 hectares during 2024-25, of which 962 hectares was in Puducherry region, 163 hectares in Karaikal region, 404 hectares in Mahe region and 268 hectares in Yanam region. It is significant to note that in Mahe, 81.95% of the total cropped area was occupied by Coconut.

| Year                          | 2024-25 | 2023-24 | % vari |
|-------------------------------|---------|---------|--------|
| Area (in Hec)                 | 1797    | 1835    | -2.07  |
| Production (Nuts in thousand) | 19,132  | 20,191  | -5.24  |
| Yield rate in nuts/hect       | 10,647  | 11,003  | -3.24  |

## GINGELLY

Gingelly was sown in an area of 546 hectares in 2024-25 as against 527 hectares during 2023–24 with an average yield of 756 kgs. per hectare.

### WHOLESALE PRICES OF PRINCIPAL AGRICULTURAL COMMODITIES AT PUDUCHERRY AND KARAİKAL MARKETS

The wholesale prices of some important agricultural commodities are collected every week in Puducherry and Karaikal Market under “Market Intelligence Scheme”.

It may be noted that the prices of Paddy, Ragi, Cumbu(T.V), Black gram, Green gram, Groundnut (with pods) and Gingelly seeds are collected from the Puducherry Regulated Marketing Committee for Puducherry region and as such only the price of Paddy is collected from Karaikal Regulated Marketing Committee.

## **THE ANALYTICAL NOTE ON THE PRICE TRENDS IN PUDUCHERRY AND KARAİKAL MARKETS IS GIVEN BELOW:**

### **PADDY**

The annual average wholesale price of Paddy (I-sort) in Puducherry Regulated Marketing Committee was at Rs.2,190.18 per quintal and in Karaikal Regulated Marketing Committee, Paddy was available on the month of February at Rs.2,720.00 per quintal and a mixed trend has been observed during the last five years as may be seen from table -VI A and VI B.

### **RICE (BOILED – I SORT)**

The annual average wholesale price of Boiled Rice (I-sort) in Puducherry market was reported as Rs.6,891.67 per quintal and in Karaikal market was at Rs. Rs.5,283.33 per quintal during the year 2024-25 and a similar mixed trend as that of Paddy was noticed in the price of rice also during the last five years.

### **RAGI AND CUMBU**

The annual average wholesale price of Ragi in Puducherry Regulated Marketing Committee for the year 2024-25 stood at Rs.3,970.75 per quintal as against Rs. 3,456.13 in 2023-24 showing an increasing trend and the annual average wholesale price of Cumbu(T.V) was reported as Rs.3,671.30 per quintal in 2024-25 as against Rs. 7,084.22 in 2023-24 registering an decreasing trend.

The increasing trends prevailed in the Puducherry for Bengal gram and Green gram and the trends decrease in the price of Groundnut (with Pods) and Gingelly seeds.

The other principal Agricultural Commodities collected in the Open markets are detailed in the tables VI A and VI B which may show mixed trend.

## **WAGES PAID TO AGRICULTURAL LABOURERS**

Statistics relating to daily wages paid to agricultural and skilled labourers are collected every month from four selected centres at Puducherry region, two selected centres at Karaikal region and one selected centre at Mahe and Yanam region of the Union Territory of Puducherry. The agricultural labourers are mainly classified into two groups viz., i) Field Labourers and ii) Skilled labourers.

Agricultural field labourers comprise of Ploughmen, Sowers, Transplanters, Weeders, Reapers & Harvesters and Tractor Driver. Skilled labourers are Carpenters, Blacksmiths and Mason. Data regarding average daily wages paid to agricultural labourers during 2024-25 in Puducherry, Karaikal, Mahe and Yanam regions are detailed in the tables VII-A, VII-B, VII-C and VII- D (at page No. 50-53). The summary table consists of the average daily wages in respect of the Union Territory of Puducherry.

The average daily wages paid to each category of labourers had been computed with simple arithmetic mean of the wage rates that prevailed in the eight selected centers on the last working day of every month during the year 2024-25.

The average daily wages paid (in Rupees) to the agricultural and skilled Labourers in the UT of Puducherry (Pg.32) are detailed below:

### **FIELD LABOUR**

#### **SOWERS AND TRANSPLANTERS**

The average daily wages paid to Men was estimated as Rs.752.67 and that of women was estimated as Rs.454.33 for the year 2024-25.

## **WEEDERS**

The average daily wages paid to Men was Rs.758.33 and that of women was reported as Rs.451.33 for the year 2024-25.

## **REAPERS AND HARVESTORS**

The Harvesting of Paddy is done through Machine in the Puducherry region whereas the Harvesting of Paddy is done manually at some fields of Karaikal and Yanam regions.

The average daily wages paid to Men was Rs.775 whereas to Women was Rs.450.

## **OTHER AGRICULTURAL LABOURERS**

The average daily wages paid to this category men was Rs.816.67 whereas for women labourers it was reported as Rs.554.17.

The average daily wages paid to the Tractor Driver was 933.33.

## **SKILLED LABOURERS**

The average daily wages for Carpenters ranged to Rs.920.83 and the Blacksmith's average wages was reported as Rs.916.67 and that of Mason was 912.50.

## **REVIEW ON AGRICULTURAL INDICES**

Agricultural Indices are computed with the base year of triennium ending 2007-08 = 100. Index numbers for area under all Crops, Net area sown, Yield, Agriculture production, cropping intensity, productivity per hectare and cropping pattern are constructed.

The index of area under all crops shows a mixed trend due to unstable cropping pattern followed by ryots and availability of water. In 2024-25 the index is 69.55 as compared to 79.97 in 2023-24.

The index of net area sown also varied from year to year. It was 96.27 in 2007-08 whereas in 2024-25 it was 67.50.

The index of yield per hectare crossed the 100 mark for the past fifteen years, which is a good sign of improvement. The current year 2024-25 the index number is 123.53.

The index of agricultural production was 53.60 in the agricultural year 2024-25 whereas, it was 77.11 during 2023-24.

The index of cropping intensity was 103.04 in the year 2024-25, whereas it was 106.65 during 2023-24.

The index of Productivity per hectare stood at 79.42 in the agricultural year 2024-25, as against 102.84 for the agricultural year 2023-24.

The index of cropping pattern was 62.40 in the year 2024-25, whereas it was 77.17 during 2023-24.

## AGRICULTURE CENSUS IN THE UNION TERRITORY OF PUDUCHERRY

The U.T of Puducherry has participated in 1970-71 census sponsored by the Government of India for the first time. Data required for the first Agriculture census were collected by the method of re-tabulation of data from the land records. Accordingly, the list of operational holders, along with the particulars of survey numbers operated tenancy details and other particulars like resident/ non-resident were compiled by the Village Administrative Officers of Revenue Department by re-tabulation of data from the revenue records. The Field Supervisors of the Directorate of Economics and Statistics with the help of the list of holders furnished by the Village Administrative Officers and the Khasra Registers prepared by them ( Field Supervisors). Scrutinize the schedules L1, L2 and L3 and finalize the table on operational holders.

The Tenth Agriculture Census 2015-16 was conducted in the Union Territory on complete enumeration basis in collaboration with the Revenue Department through re-tabulation of data available in the villages land records of the Revenue Department and Khasra register maintained by the Directorate of Economics and Statistics at the village level. The Secretary (Economics and Statistics) and the Director of Economics and Statistics were nominated as Agriculture Census Commissioner and Additional Agriculture Census Commissioner respectively for planning, monitoring and organization of the Census operation in this Union Territory.

The Agriculture Census 2015-16 comprised of two phases viz 1) Agriculture Census 2015-16 and 2) Input Survey 2016-17. Under the Agriculture Census, data were collected for the following 6 characteristics according to 5 size classes of operational holdings: -

- 1) Number and area of operational holdings
- 2) Tenancy/Terms of leasing
- 3) Land Utilization
- 4) Irrigation status and source-wise area irrigated
- 5) Cropping pattern, and
- 6) Dispersal of holdings

| <b>Size Class</b> | <b>Average Size of Holdings (Ha)</b> |                | <b>Percentage change<br/>(in %)</b> |
|-------------------|--------------------------------------|----------------|-------------------------------------|
|                   | <b>2010-11</b>                       | <b>2015-16</b> |                                     |
| (1)               | (2)                                  | (3)            | (4)                                 |
| Marginal          | 0.3453                               | 0.2889         | -16.33                              |
| Small             | 1.4637                               | 1.4517         | -0.82                               |
| Semi Medium       | 2.8560                               | 2.7299         | -4.42                               |
| Medium            | 5.7168                               | 5.5988         | -2.06                               |
| Large             | 16.9038                              | 17.3778        | 2.80                                |
| All Categories    | 0.6561                               | 0.6166         | -6.02                               |

Under the Input Survey 2016-17, information was collected according to five size-groups of operational holdings for the following items: -

- 1) Number of parcels;
- 2) Multiple cropping, separately for irrigated and un-irrigated areas;
- 3) Use of chemical fertilizers, organic manures and pesticides, separately for irrigated and un-irrigated areas under crops;
- 4) Use of agriculture equipment and machines;
- 5) Agriculture credit availed;
- 6) Type of seed used;
- 7) Integrated pest management;
- 8) Size of household, educational qualification of land holder;
- 9) Soil Health/Soil testing.

## PART-II SUMMARY OF TABLES

### A. CLASSIFICATION OF AREA

(In Hectares)

| Sl.No | Head of Classification                                                        | 2020-21 |            | 2021-22 |            | 2022-23 |            | 2023-24 |            | 2024-25 |            |
|-------|-------------------------------------------------------------------------------|---------|------------|---------|------------|---------|------------|---------|------------|---------|------------|
|       |                                                                               | Area    | % to Total | Area    | % to Total | Area    | % to Total | Area    | % to Total | Area    | % to Total |
