INTENSIFIED PULSE POLIO IMMUNIZATION PROGRAMME

For complete eradication of Polio from India, Govt. of India in collaboration with World Health Organization is implementing Pulse Polio Immunization Programme since 1995, which is a great success in the Union Territory of Puducherry and no case of polio was reported since 1999. No cases of vaccine preventable diseases like Neo-Natal Tetanus, Whooping Cough, Polio and Measles were reported during the year 2009-10. There was 100% immunization on pregnant women with Tetanus Toxoid. About 100% of children below 1 year of age were immunized against Measles. Most of the children in the age group of 10 and 16 years were immunized against Tetanus. No case of Tetanus was reported during the year 2009-10

During 2009-10, Hepatitis 'B' vaccination as a Pilot Project was implemented in the district of Puducherry, Mahe and Yanam in the UT of Puducherry. In this programme, children in the age group of 0-1 year were immunized against Hepatitis 'B'.
